- You should check the comments if you didn't, I added more info there, it's the speech bubble in the top right corner.
- I think you should have music play throughout the whole videos to add some more to the scenes.
    - But I recommend against using licensed music due to it being a copyright nightmare, I'd recommend royalty free music or video game osts, plus music with lyrics would be a bit weird.
- I decided to un-retire Jim… so you can use him again.
